

The Next Generation

The purpose-built E7™ has already revolutionised the UK's hackney taxi market. Now Cab Direct and Peugeot bring you a new generation, tailor-made for the professional taxi driver with the latest in Euro 5 diesel technology under the bonnet.

For more information or to arrange your free, no-obligation test drive telephone **0800 587 9630**, email info@cabdirect.com or visit www.cabdirect.com. We look forward to meeting you.

Purpose-built Taxi

Think Smart, Think **E**

Six-seat passenger compartment

Protective bumpers with integral systems

Original EasyGlide™ pull

Development

A £473 million development programme has created the ideal combination of engine, clutch and gearbox, designed and tested in tandem with the E7's high-strength monocoque vehicle body. Modern design excellence is carried through to the superb driving position, high impact partition screen and comfortable rear passenger compartment to complete the ideal hackney taxi.

Side rubbing strips and large, multi-section bumpers provide vital protection against minor bumps and scrapes. And unlike many other taxis, the E7™ comes to you with the reassurance of the highest possible standard of safety testing – European Whole Vehicle Type Approval (Type Approval number e11*2001/116*0315).

Drive in Style

Dash-mounted Intercom

When your vehicle is your workplace, comfort and convenience are certain to be high on your list of requirements. Which is exactly why E7™ offers a new dimension in driver benefits.

Comfort Cab

Inspired vehicle design has created even greater driver comfort. The carefully sculpted driver's seat comes with active, pump-action height and tilt adjustment which, combined with steering column adjustment, allow you to create your optimum driving position. E7's top-specification driver's seat even provides additional lumbar support – perfect for anyone who spends long hours behind the wheel. In addition the low, one-step well is also ideal for anyone who gets in and out of the cab several times a day.

FareAssist™ quick release door system

Overhead storage compartments

Electric one-touch windows, multi-function heater and air conditioning -- all as standard features -- mean you're sure to find the right working temperature, whatever the weather. The in-built CD/radio comes with remote controls, handily located on the steering column. You can even choose to play front and rear speakers or switch to front only, so you can enjoy your favourite music while your passengers chat amongst themselves. Plus, for even greater convenience, the E7™ taxi now also features our unique new FareAssist™ quick release door system. This means you can unlatch your passenger doors at the touch of a button.

Storage Space

You'll also find numerous storage areas for the daily essentials of the

Driveability

Think Smart, Think **E**

Six-speed Peugeot auto gearbox

**Now Available in
Auto or Manual**

Quite simply E7™ drives like a dream. Numerous independent road tests have highlighted the vehicle's superb all-round vision, manoeuvrability and handling.

The raised driver position plus large area windscreen and side windows create exceptional visibility, especially useful in busy traffic. Similarly the large area tailgate window provides enhanced rear visibility which, together with superb full-size wide angle door mirrors, will make your life as easy as possible. Add to this Peugeot's latest electro hydraulic speed-sensitive power-steering and the legendary responsiveness of the HDi engine and you have a nimble and manoeuvrable cab that's ideal for the busiest traffic conditions.

Speed sensitive power

Now, for the first time, you also have the choice of Peugeot's easy action six-speed gearbox or the all-new, fully automatic option -- so smooth you'll scarcely know you've changed gear.

Passenger Comfort

E7's spacious passenger compartment promises your customers a relaxing journey, every fare.

Excellent road-holding and modern suspension guarantee passengers a flat and comfortable ride. Inside, comfortable facing seating accommodates six passengers in the rear compartment. Plus, with the addition of our new soft-sit rear tip up seats, your customers will now enjoy even greater comfort levels. Finished to the highest quality using proven, hard-wearing material, the passenger area also benefits from separately controlled heating. Similarly the dash-mounted EasyTalk™ two-way intercom – uniquely designed for the E7™ with variable audio control – makes communication easy. Business passengers can even plug in their laptop as they enjoy the journey.

Bags of Space

Whether it's hotels, train stations or airport runs, today's passengers often come with plenty of luggage. Which is why E7™ brings you an amazing 70% more luggage space. Even better, the celebrated EasySlide™ rear seat enables you to create even more room for loading cases out of harm's way. For added storage choose an additional luggage pen up front, beside the driver. You also have the option of the E7™ Plus, with even greater luggage room – ideal for regular airport fares.

Safety Zone

Sadly, protection from violence against taxi drivers is becoming ever more important. The steel reinforced partition features a high-impact protection screen tested to European standards. The driver can also choose added security by locking both front doors while the rear doors remain open for passengers.

Access for All

Taxis provide a vital component of the UK's public transport network. Disabled people in particular often depend on taxis to get about, which is why E7™ raises standards in accessibility for disabled passengers. Options include induction loops for the hard of hearing, while all E7's are fully wheelchair accessible.

Easy does it

Manual or cab-operated electric side-steps, together with high-visibility grab handles and floor edging assist passenger entry and exit, while both rear and tip-up seats are ergonomically designed for ease of use. E7's wide doorway is a bonus for wheelchair users in particular. You also have a choice of wheelchair ramps, depending on the model, including the revolutionary EasySlide™ pull-out ramp – even lighter, even quicker and even easier to use.

Wheelchair Security

Once inside the vehicle, the larger flat-floor area and improved headroom make manoeuvring the wheelchair into the correct travelling position so much easier than in other hackney cabs. Quick-attach restraints make securing the wheelchair as easy as possible and the wheelchair passenger is also secured by a full lap-and-diagonal seatbelt. Both wheelchair and occupant restraints have been tested to the highest standards ever achieved in a UK taxi.

Features & Options

Sliding rear seat

FareAssist™ quick release door system

Increased luggage space

New higher-visibility LED taxi sign

Purpose-built for the taxi trade, E7™ is designed and built with a host of modern features to benefit you and your passengers.

All models are also available in the longer E7™ Plus for even more luggage space.
