**WARNING**

Significant hazards exist in the architectural design shown on this drawing have been assessed and identified with appropriate risk and control measures. These should be followed in consultation with all other disciplines which have been identified and included within construction phases and site. This assessment does not mean that this drawing will be covered by a competent design professional, where appropriate, to be approved under the Building Regulations.

Significant hazards are defined as:

- Those that likely to be avoided by a competent contractor or other
- Those that are not avoidable
- Those that are difficult to manage effectively.
