### Update on Future Fit Programme

NHS Shropshire and Telford CCGs are continuing to develop the consultation documents and survey in preparation for the launch of the Future Fit consultation. We enclose the following draft documents for the Telford & Wrekin Health & Wellbeing Board:

In developing the consultation documents, we have worked closely with both the Consultation Institute and a patient reader group which has included representation from Shropshire, Telford & Wrekin and mid Wales. Over the past three months, we have taken on board many comments and suggestions from a wide range of stakeholders. This includes the CCG boards, SaTH Board, Joint HOSC and Telford & Wrekin Council. We have also incorporated comments and feedback from NHS England following a series of constructive meetings.

The draft Consultation Plan details our aims and objectives, the activity to date and legislation and guidance on consultation. It also sets out the process we will follow during consultation and how we plan to reach our stakeholders and includes a draft schedule of events and meetings.

The Programme continues to follow a robust assurance process and we are currently awaiting formal feedback from NHS England regarding next steps.
