

Draft Consultation documents - summary of key changes since documents were last submitted to the Joint HOSC

Both the long and summary consultation documents are now available fully designed. The following is an overview of significant changes made since the documents circulated for the meeting on 25 September 2017.

Both documents remain in draft and further work to refine content will be undertaken until final approval.

Long Document:

Page 2: What is not covered in this consultation – this has been moved from the end to the start of the document for clarity

Page 31: Impact on Women and Children's Services – figures and narrative now included

Summary Document:

This document was scheduled for completion in line with the 'master' long document. The new content has been taken from the long document seen by members at the 25 September meeting. Some of the content may have been edited in order to incorporate information into the shorter format of the summary document.
